

Commission Payout Structure

Effective as configured on August 12, 2026

How your commission works

- Commission is calculated from the sales recorded in the point-of-sale system. Every sale line is checked against the rules of the plan you are assigned to.
- When a line matches a rule, it earns that rule's rate. A single sale can earn from more than one rule — for example a device and its accessories.
- Returned, voided and refunded sales do not earn commission. Chargebacks are deducted from the payout for the period in which they are applied.

Total Employee Comp Chicago

Applies to: 32 named employees, Market: Chicago

What pays	When it applies	Rate	How often

Edge2	Payment method is "Cash; TW Financing Prepaid"	\$25.00	Once per device

Included in this plan but not paid

Upgrade — Contract type is "Upgrade". Currently set to zero — earns no commission.

Notes

- Paid once for each device on the sale. The other items on the same receipt (accessories, rate plans, activation fees) do not each earn this amount.

This document describes the commission structure as configured on the date shown. It is not a statement of earnings and does not create an entitlement to any amount. Your own earnings for a period are shown on your individual commission statement.
